Constructing Risk Stephen O. Bender, 2021-08-13 Reviewing current policies and practices, the book assesses the financial, economic and physical risk of building in hazardous areas, and looks at how societies approach economic development while trying to create a more resilient built environment in spite of the dangers. Coastal Zone Management Handbook John R. Clark, 2018-05-04 Coastal Zone Management Handbook comprises the first complete manual on coastal resource planning and management technology. Written by an international consultant, this handbook reflects a global perspective on the natural resources, sensitivities, economics, development, productivity, and diversity of coastal zones. The emphasis is on tropical and subtropical coastal ecosystems, but the information is widely applicable. In addition to its comprehensive coverage of general concepts related to coastal regions, the book describes the strategic basis for coastal management, provides a set of working tools for management and planning activities, and presents case histories of management projects around the globe. Extensive references are provided for each management analysis, practice, technique, and solution. Coastal Zone Management Handbook is made up of four sections:

Institutional Arrangements for Managing Coastal Resources and Environments Jens C. Sorensen, Scott T. McCreary, 1990

Primer on Natural Hazard Management in Integrated Regional Development Planning, 1991

The Role of Forestry in Sustainable Development of Dryland Regions, 1989

MANAGING CRISES Uriel Rosenthal, Arjen Boin, Louise K. Comfort, 2001-01-01 In this book, the editors, with 25 notable contributors, expand the knowledge of crisis management, focusing on case studies of high-profile events that have occurred in recent history. Part One of the text aims at theoretical development through empirical case studies and also postulates a crisis typology and charts specific theoretical and administrative challenges. The 'case bank,' which comprises the bulk of the book, is presented in four additional sections. The first deals with the development of crises and compares the infamous Watts riots with the 1992 L.A. riots. It also analyzes the fragmented and complex international environment that allowed the 'safe area' in Bosnia to be overrun by Bosnian Serbs in 1995. The final chapter chronicles the incredible human costs of

mismanaged crisis in the Rwanda massacres in 1994. The second section explores the many decisional dilemmas that confront crisis managers. Cases include the fire at the Piper Alpha oil rig; the 1999 Turkish earthquakes; the Eindhoven, Holland plane crash; and crisis management of the Mad Cow epidemic disease in the U.K. The third section explores the long-term dimensions of crises and crisis management and particularly the development of national traumas such as the assassination of Sweden's Prime Minister Olaf Palme in 1986, the 1992 Amsterdam air crash, and the TWA flight 800 disaster in 1996. The final section shifts focus to future scenarios such as speculative information technology disasters, potentially devastating viral epidemics, deteriorating environmental and societal conditions in Russia, the southwest U.S. coming water shortage, and the outlook for Japan, one of the world's most disaster-prone countries. Summarizing the research findings of the past decade, the authors describe patterns in the paths toward crises, the dilemmas and coping mechanisms that emerge during the thick of crisis, and, very importantly, the pathways that lead away from crisis.
